Summary

Data science student passionate about software development and machine learning. Seeking opportunities to apply technical and analytical skills to real-world problems, contribute to impactful projects and grow as a developer.

Education

- GH Rasoni College of Engineering and Management, Nagpur
- Bachelor of Technology in Data Science Engineering Graduation: 2026

Technical Skills

- Languages: Python, SQL, C++, HTML, CSS
- Databases: PostgreSQL, MySQL, Chroma DB
- Tools: PowerBI, Tableau, Excel
- Data Skills: ETL (SQL, Python-Pandas), Data Cleaning

Experience

Intern – National Remote Sensing Centre (NRSC), ISRO Jan 2026 – Aug 2026

- Working as a **Data Analysis Intern** at **NRSC (ISRO)**, contributing to projects focused on intelligent information access and retrieval systems.
- Actively involved in developing a **Document Retrieval System** for NRSC's internal website, aimed at efficiently searching and retrieving information from large, structured datasets.
- Designed and implemented text preprocessing pipelines, including data cleaning, tokenization, and vectorization for improved search accuracy.

Projects

Emotion Detection Using EEG (CNN-based Model) github.com/KaustubhGavankar/emotion-detection-cnn

- Built a Convolutional Neural Network (CNN) model to classify human emotions using EEG signal data.
- Preprocessed time-series data and implemented model training using TensorFlow and Keras.
- Achieved high accuracy through hyperparameter tuning and visualization of EEG emotion patterns.

AlpaCare Medical Instruction Assistant github.com/KaustubhGavankar/alfacarefolder

- Fine-tuned a <7B parameter pre-trained LLM using the lavita/AlpaCare-MedInstruct-52k dataset to develop a safe, non-diagnostic medical instruction assistant.
- Implemented parameter-efficient fine-tuning (LoRA/PEFT) on Google Colab with GPU optimization.
- Tech Stack: Python, PyTorch, Hugging Face Transformers, PEFT/LoRA, Google Colab, Pandas, NumPy.

Automated Question paper Generator github.com/finalYRProject001/QuestionPapergenerator

- Developed an automated system for generating question papers with high accuracy and minimal manual effort.
- Designed a database-driven question bank using MySQL, ensuring non-repetitive, randomized question selection for unbiased paper generation.

Certifications

- Python Programming Internship Certificate – CodSoft (July 2024)
- Data Analysis internship NRSC- ISRO (ONGOING-2026)
